App Projects

Sales Follower

- Pick your favorite stores that you love to shop at and the app will show you current deals with those stores.
- Connected an affiliated marketing API, ShopStyle, that shows a user current sale products in their favorite brands that they selected.
- Technologies used: Ruby on Rails, Bootstrap 4, Devise, ShopStyle API

Loyalty Points

- Created a loyalty card/rewards based application with an admin page to give reward points to a customer
- Technologies used: Ruby on Rails, Bootstrap 3, Active Admin, Rspec

Trailhead

- Collaborated with a team for 8 days to develop a hiking trail finder app.
- Responsible for: Rails routing, adding a feature to upload pictures, saving images to an Amazon S3 cloud server, image carousel to display pictures from S3, integrating Codeship, and deploying to Heroku.
- Technologies used: Ruby on Rails, Carrier Wave, Fog, Amazon S3 Cloud Server, Codeship, Heroku

Experience

Franchise Owner, Flip Flop Shops — 2014-Present

- Establish, own, and co-manage operations for a retail footwear concept in the mall.
- In charge of sales generation, marketing, profitability, and inventory management.

Marketing Manager, University Inn — 2005-Present

- Created responsive website using Wordpress while testing plugins for speed and visibility to help increase revenues with direct bookings.
- Delivering $265,000 in additional online sales revenue with an 86% growth in 2013.
